

HLC – 2º DAW

Installing VMware and creating its installation user guide

Task. Implement the following steps:

Step 1. Download the VMware virtual machine. You can download it from the following URL:

<https://www.vmware.com/es/products/workstation-player/workstation-player-evaluation.html>

Step 2. Install, step by step, VMware software and create a user guide for the installation at the same time. You should include some screen captures of the windows VMware installation and describe what the user has to do in order to install the software. The following contents are compulsory in the user guide:

- 0.- A cover page, an index of contents and numerated pages included in the index.
- 1.- Introduction. This point must describe what is VMware and the problem that it solves.
- 2.- System Requirements. The document must indicate the architecture, the operative system supported, and how to download VMware.
- 3.- Installing VMware. This section has to describe how to install VMware and include some screen captures of the windows. A caption must be added in each image and cited in the text. Here you are an example:

There are a lot of amazing places in the world. One example of this is Sierra Nevada. It is a mountain range in the region of Andalusia, in the province of Granada in Spain. Figure 1 shows its beauty.
